Bulletin 007

Version 090109

Right-of-Way Obstructions

Purpose:

The purpose of this bulletin is to inform permit applicants of submittal and key installation requirements for roll-off dumpsters, storage PODS and other public right-of-way obstructions.

Applicability:

The information presented herein is applicable to all projects covered by the 2003 International Residential Code, particularly 1- and 2-family residential structures. This document may be updated periodically. Please check the department's web page to verify you have the current version of this document.

Submittal Requirements:

- A completed Application for Right-of-Way Obstruction Permit must be submitted.
- The name of the dumpster company must be indicated on the permit application form.
- Items placed wholly on private property do not require a Right-of-Way Obstruction Permit.

Key Installation Requirements:

- A lighted barricade must be placed at each end of an obstruction of the public right-of-way. The applicant is responsible for the coordination of the delivery and placement of the barricades. Check with your dumpster company before delivery to verify if they will provide barricades for you. See sketch below for proper placement of the barricades. Properties without properly placed barricades may be issued a citation without prior warning notice. Each day without properly placed barricades may constitute a separate violation.
