

Construction Preview

2003 construction season is about to begin

The 2003 construction season will include some 22 separate new projects in the Village, ranging from road resurfacing, and water and sewer main replacement to alley reconstruction, parking improvements and the ongoing replacement of curbs and sidewalks. Also included in the Village's upcoming construction season will be the completion of projects begun the previous year, such as the 2.5-million-gallon reservoir addition at Stevenson Park on Lake Street near Austin Avenue, and the new Tasty Dog restaurant at Lake Street and Euclid Avenue.

Resurfacing of North Avenue from Harlem Avenue to Narragansett Avenue will be the 2003 construction season project likely to create the greatest traffic disruption. The surfacing project, expected to run from April through June, is managed by the Illinois Department of Transportation since North Avenue is a state highway.

The map on the reverse side of this insert provides a quick by-neighborhood reference to the many projects planned for the months ahead. As project start dates approach, residents who live in areas most affected will receive a written alert, including start times and estimated completion dates, and a telephone number to call for the latest information. Parking permit holders affected by construction will be notified prior to work beginning so that temporary alternate parking arrangements can be made.

A special construction update telephone line – 358.5701 – also will provide regularly updated recorded messages on the largest projects around the clock. Residents who call during regular work hours of 7:30 a.m. to 4 p.m., Monday through Friday, also can reach an operator for the latest information on any specific project.

In addition, information on traffic disruptions and alternate travel routes will be posted on the Village's website, www.oak-park.us, and broadcast on VOP-TV, Channel 6, the government access cable television station.

For more information, call 358.5720 or email publicwork@oak-park.us.

2003 CAPITAL IMPROVEMENT PROJECTS
