Proposal for Private Event Space

Executive Summary

This proposal outlines the concept and operational plan for a private event space available for rent to individuals and organizations. The venue will serve as a flexible, professional environment for conferences, workshops, training sessions, art displays, meetings, and private gatherings.

The space will operate exclusively for private bookings and will not function as a public venue, nightclub, or club-affiliated location. Events will not involve public ticket sales or payments at the door. Access will be limited to invited guests of the renting client.

The model prioritizes professionalism, privacy, and community value while maintaining compliance with local regulations and responsible venue management.

6136 Roosevelt Rd

EXPLAIN WHY IN YOUR OPINION, THE GRANT OF THIS REQUEST WILL BE IN HARMONY WITH THE NEIGHBORHOOD AND NOT CONTRARY TO THE INTENT AND PURPOSE OF THE ZONING ORDINANCE OR COPREHENSIVE PLAN:

Statement of Zoning Justification

Private Event Space – RR District

Village of Oak Park, Illinois

The proposed private event space is consistent with and supportive of the intent and purpose of the RR (Roosevelt Road) Zoning District and the Village of Oak Park Comprehensive Plan. The request will not be contrary to the public interest and will remain in harmony with the surrounding neighborhood for the following reasons:

---

1. Consistency with the Intent of the RR District

The RR District is intended to support commercial, service, office, and mixed-use activities along the Roosevelt Road corridor while promoting pedestrian engagement and neighborhood-serving businesses.

The proposed event space:

- Operates as a **commercial rental venue**, consistent with business and service-oriented uses contemplated within the RR District.
- Functions in a manner similar to meeting halls, training centers, cultural spaces, and assembly uses typically found in commercial corridors.
- Activates commercial space without introducing retail congestion, heavy traffic turnover, or daily high-volume operations.

The use supports the RR District's goal of maintaining viable commercial activity while allowing flexible occupancy models that respond to evolving business needs.

---

2. Harmony with the Neighborhood

The proposed event space is designed to operate in a controlled and low-impact manner:

- Events are **private and invitation-only**.
- No public ticket sales or cash collection at the door.
- No club, nightclub, or late-night entertainment operations.
- Defined hours of operation.
- Compliance with occupancy limits and life-safety codes.
- Adherence to local noise ordinances.

Because the space is rented by appointment rather than operating as a continuous public venue, the intensity of use is moderated and predictable. This controlled structure reduces impacts related to parking, noise, and pedestrian congestion.

Additionally:

- Events such as workshops, conferences, trainings, art exhibits, and private gatherings are inherently structured and time-limited.
- The use does not generate outdoor amplification, loitering, or open-entry traffic patterns.
- The operational model aligns more closely with a professional office or community meeting facility than an entertainment venue.

As such, the proposed use will not adversely affect adjacent properties.

---

3. Alignment with the Comprehensive Plan

The Village of Oak Park Comprehensive Plan emphasizes:

- Strengthening commercial corridors
- Supporting small business and entrepreneurial activity
- Encouraging adaptive reuse of commercial space
- Promoting walkability and economic vitality

The proposed event space directly supports these objectives by:

- Activating underutilized commercial property.
- Providing a flexible business model that serves local organizations, small businesses, and community groups.

- Supporting professional development, educational programming, and creative arts.
- Encouraging pedestrian activity without introducing incompatible land uses.

The use contributes to economic vitality while maintaining compatibility with surrounding residential areas.

---

4. No Adverse Impact on Public Health, Safety, or Welfare

The proposed operation includes:

- Formal rental agreements for all events.
- Clear use restrictions prohibiting public open-entry events.
- Compliance with building, fire, and occupancy regulations.
- Responsible alcohol policies (if applicable and permitted).
- Optional event oversight or management presence.

Because the venue does not function as a nightclub, bar, or public entertainment facility, it avoids the operational characteristics typically associated with higher-intensity assembly uses.

The use is structured, scheduled, and contract-based, ensuring accountability and compliance.

---

5. Compatibility with Roosevelt Road Corridor Character

The Roosevelt Road corridor includes a mix of retail, service, office, and commercial uses. A private event space complements this character by:

- Serving as a flexible commercial service use.
- Drawing patrons who support nearby restaurants and businesses.
- Enhancing corridor activity without creating daily retail competition.
- Maintaining a professional and community-oriented identity.

The space will contribute positively to the commercial vitality of the corridor while respecting its mixed-use context.

Conclusion

The proposed private event space is:

- Consistent with the commercial intent of the RR Zoning District.
- Compatible with surrounding properties.
- Supportive of the Oak Park Comprehensive Plan goals.
- Structured to minimize neighborhood impact.
- Not contrary to public health, safety, or welfare.

For these reasons, granting approval for this request will be in harmony with the neighborhood and fully aligned with the intent and purpose of the RR Zoning Ordinance and the broader planning objectives of the Village of Oak Park.

Operation Guidelines for Q6 Events (intended name for event space)

Staffing- There will be staff on-site. They will be responsible for the logistical execution and guest experience of an event. Their roles typically fall into three phases: setup, live operation, and teardown.

Days and Hours- The operating days consist of peak days and non-peak days. Peak days are Friday- Sunday. Non-peak days are Monday-Thursday. The hours will be set up in time blocks.

- **Standard Live Event Time**:
    - **Non-Wedding Events**: Typically **4 hours** of live time with **2 hours** for setup.
    - **Weddings**: Typically **5–6 hours** of live time with **2–4 hours** for setup.
- **Rental Windows**:
    - **Full-Day Rentals**: Often cover a 10–12 hour window, such as **8:00 AM – 8:00 PM** or **12:00 PM – 12:00 AM**. Music is down at 11 pm and clean-up until 12am.
    - **Time Slots**: specific shifts will be **10:00 AM – 2:00 PM** (showers/ceremonies) or **3:00 PM – 11:00 PM** (receptions).

Safety and Security- A security guard's primary duty at an event space is to ensure the safety of all attendees, staff, and performers while protecting the venue's property and assets. Their role is a mix of surveillance, preventative screening, and active crowd management to maintain a secure environment. They will manage entry points, monitor the flow of people to prevent overcrowding, conduct regular physical of the grounds, intervene in disputes to calm rowdy guests, act as a first line of defense during crises such as fires or medical emergencies, and safeguarding valuable equipment. The number of security guards will depend on the number of attendees. Their will be one guard for 50- 100 guests.

March 23, 2026

Guest Compliance- While guests are there to enjoy themselves, they have a "code of conduct" to ensure the event runs smoothly and safely. Most venues and hosts expect guests to follow these basic responsibilities:

1. Safety & Compliance

- **Following Rules:** Adhering to venue policies, such as staying out of "Staff Only" and respecting "No Smoking" or "No Vaping" signs.
- **Prohibited Items:** Refraining from bringing restricted items like outside alcohol, weapons, or professional recording equipment if banned.
- **Emergency Cooperation:** Following instructions from **security or staff** immediately during an evacuation or medical emergency.

2. Behavioral Expectations

- **Responsible Consumption:** If alcohol is served, guests are expected to drink responsibly. Security may remove guests who become a danger to themselves or others.
- **Respectful Interaction:** Treating event staff, security, and other attendees with courtesy. Harassment or physical altercations are usually grounds for immediate removal.
- **Noise Levels:** Respecting the volume expectations of the venue, especially when entering or leaving the space late at night in residential areas.

3. Logistical Responsibilities

- **RSVP & Check-in:** Arriving within the designated window
- **Property Respect:** Avoiding the "intentional" damage of venue property (furniture, decor, or restrooms). Hosts are liable for damages caused by their guests.
- **Personal Belongings:** Keeping track of their own items. Q6 Events is **not responsible** for lost or stolen coats, bags, or phones.

4. Space Maintenance

- **Waste Disposal:** Using provided trash and recycling bins rather than leaving cups or plates on tables or the floor.
- **Clear Walkways:** Keeping personal items (like large bags or strollers) out of main aisles to prevent tripping hazards.

Pricing - TBD

ENLARGED ACCESSIBILITY PLANS

SHEET #
A5.10

GENERAL

1. IT SHALL BE THE RESPONSIBILITY OF THE CONTRACTOR TO COORDINATE THE STRUCTURAL WORK WITH THE ARCHITECTURAL, MECHANICAL, AND ELECTRICAL DRAWINGS, AS WELL AS ANY OTHER APPLICABLE TRADES. IN CASE OF CONFLICT BETWEEN THE STRUCTURAL WORK AND DRAWINGS RELATED TO OTHER TRADES, THE CONTRACTOR SHALL MAKE ALLOWANCES IN HIS BID FOR THE MORE SEVERE REQUIREMENTS. CONFLICTS BETWEEN THE STRUCTURAL WORK AND THE DRAWINGS OF OTHER TRADES SHALL NOT BE REASON FOR ANY EXTRA COST OR DELAY IN EXECUTION OF THE WORK. CONTRACTOR IS RESPONSIBLE FOR COORDINATING THE REQUIREMENTS OF ALL DRAWINGS INTO THEIR SHOP DRAWINGS AND WORK.
2. NO CHANGE IN SIZE OR DIMENSION OF STRUCTURAL MEMBERS SHALL BE MADE WITHOUT THE WRITTEN APPROVAL OF THE ARCHITECT.
3. THE CONTRACTOR IS RESPONSIBLE FOR LIMITING THE AMOUNT OF CONSTRUCTION LOAD IMPOSED UPON STRUCTURAL FRAMING. CONSTRUCTION LOADS SHALL NOT EXCEED THE CAPACITY OF THE FRAMING AT THE TIME THE LOADS ARE IMPOSED.
4. THE STRUCTURE IS DESIGNED TO FUNCTION AS A UNIT UPON COMPLETION. THE CONTRACTOR SHALL FURNISH ALL TEMPORARY BRACING AND/OR SUPPORTS REQUIRED AS THE RESULT OF THE CONTRACTOR'S CONSTRUCTION METHODS AND/OR SEQUENCES.
5. USE ONLY DIMENSIONS INDICATED ON THE DRAWINGS. DO NOT SCALE DRAWINGS OR USE ANY DIMENSIONS TAKEN FROM ELECTRONIC DRAWING FILES.
6. THE CONTRACTOR SHALL INFORM THE ARCHITECT IN WRITING OF ANY DEVIATION FROM THE CONTRACT DOCUMENTS. THE CONTRACTOR SHALL NOT BE RELIEVED OF THE RESPONSIBILITY FOR SUCH DEVIATION BY THE ARCHITECT'S APPROVAL OF SHOP DRAWINGS, PRODUCT DATA, ETC., UNLESS THE CONTRACTOR HAS SPECIFICALLY INFORMED THE ARCHITECT OF SUCH DEVIATION AT THE TIME OF SUBMISSION, AND THE ARCHITECT HAS GIVEN WRITTEN APPROVAL TO THE SPECIFIC DEVIATION.
7. ALL THINGS WHICH, IN THE OPINION OF THE CONTRACTOR, APPEAR TO BE DEFICIENCIES, OMISSIONS, CONTRADICTIONS AND AMBIGUITIES IN THE PLANS AND SPECIFICATIONS SHALL BE BROUGHT TO THE ATTENTION OF THE ARCHITECT. PLANS AND/OR SPECIFICATIONS WILL BE CORRECTED, OR A WRITTEN INTERPRETATION OF THE ALLEGED DEFICIENCY, OMISSION, CONTRADICTION OR AMBIGUITY WILL BE MADE BY THE ARCHITECT BEFORE THE AFFECTED WORK PROCEEDS.

CODES

THE PROJECT DOCUMENTS REFER TO THE FOLLOWING CODES AND STANDARDS, U.N.O.

BUILDING CODE: INTERNATIONAL BUILDING CODE 2021

STRUCTURAL STEEL: MANUAL OF STEEL CONSTRUCTION ASD, FIFTEENTH EDITION THE AMERICAN INSTITUTE OF STEEL CONSTRUCTION (AISC 360 2016)

STRUCTURAL CONCRETE: BUILDING CODE REQUIREMENTS FOR STRUCTURAL CONCRETE, THE AMERICAN CONCRETE INSTITUTE (ACI 318-14)

STRUCTURAL MASONRY: BUILDING CODE REQUIREMENTS FOR MASONRY STRUCTURES, TMS 402/602-16, TMS403-17, OR TMS 404

STRUCTURAL WOOD: AWC NDS 2018

SUBMITTALS AND TESTING

FOLLOWING ITEMS REQUIRE SUBMITTALS FOR STRUCTURAL REVIEW:
1. CONCRETE REINFORCING LAYOUT
2. CONCRETE MIX DESIGNS
3. MASONRY UNIT AND GROUT DESIGNS
4. STRUCTURAL STEEL
5. STRUCTURAL STEEL CONNECTIONS
6. PREFABRICATED WOOD TRUSSES
7. HOLLOW CORE PRECAST CONCRETE PLANKS
8. SOIL IMPROVEMENT SYSTEMS

THESE SUBMITTALS MAY BE SUBMITTED FOR STRUCTURAL REVIEW IN FORM OF SHOP DRAWINGS AND CALCULATIONS, AS REQUIRED, SIGNED AND SEALED BY A LICENSED STRUCTURAL ENGINEER IN THE STATE OF ILLINOIS.

THE FOLLOWING ITEMS REQUIRE SHOP DRAWINGS, SUBMITTED FOR REVIEW OF INTERACTION WITH THE STRUCTURE:
1. ARCHITECTURAL ORNAMENTATION (FLAGPOLES, BANNERS, MASTS, ETC.)
2. COLD-FORMED METAL FRAMING
3. METAL STAIRS

THE FOLLOWING STRUCTURAL ITEMS REQUIRE TESTING AND/OR INSPECTIONS:
1. CONCRETE REINFORCEMENT
2. EXPANSION AND ADHESIVE ANCHORS
3. FOUNDATIONS
4. CAST-IN-PLACE CONCRETE
5. STRUCTURAL CONCRETE MASONRY CONSTRUCTION
6. STRUCTURAL STEEL MATERIALS, WELDS, AND CONNECTIONS.

DESIGN CRITERIA

SUPERIMPOSED DEAD LOADS:
CEILING, MECHANICAL, ELECTRICAL, FLOORING = 10 PSF

LIVE LOADS:
COMMERCIAL = 100 PSF
STAIR FRAMING = 100 PSF
STAIR TREADS = 100 PSF OR 300LBS. CONCENTRATED LOAD

HANDRAIL / GUARDRAIL:
RESIST SIMULTANEOUSLY VERTICAL AND HORIZONTAL THRUST OF 50 PLF APPLIED AT THE TOP OF THE RAILING OR A CONCENTRATED LOAD OF 200 LBS. IN ANY DIRECTION. INTERMEDIATE RAILS SHALL BE DESIGNED TO RESIST A HORIZONTAL CONCENTRATED LOAD OF 50 LBS. ON AN AREA NOT TO EXCEED 12"X 12".

SNOW LOAD:
GROUND SNOW LOAD = 25 PSF
C_e = 0.9
I_s = 1.0

ALLOWABLE DEFLECTION CRITERIA:
SUPERIMPOSED LIVE LOAD = L/480
TOTAL LOAD = L/240
MEMBER CARRYING UNREINFORCED BRICK = L/600
MEMBER CARRYING REINFORCED MASONRY = L/480

FOUNDATIONS

1. THE FOUNDATION DESIGN IS BASED ON AN ASSUMED ALLOWABLE BEARING CAPACITY OF 2500 PSF.
2. ALL SOIL SUPPORTED FOOTINGS SHALL BE FOUNDED UPON PREPARED SUBGRADE AND/OR ON ENGINEERED FILL RESULTING TO AN ASSUMED ALLOWABLE BEARING CAPACITY OF 2,500 PSF TO BE VERIFIED BY GEOTECHNICAL ENGINEER PRIOR TO CONSTRUCTION. FINAL EXACT ELEVATIONS AND SOIL BEARING CAPACITIES SHALL BE FIELD DETERMINED AND VERIFIED BY THE CONTRACTOR'S AND REVIEWED BY THE ARCHITECT/ENGINEER DURING CONSTRUCTION.
3. PLACE FOOTINGS ON UNDISTURBED, NATURAL SUBGRADE. IF SUBGRADE IS DEEMED UNSUITABLE, EXTEND EXCAVATION TO SUITABLE, UNDISTURBED, NATURAL SUBGRADE, AND RAISE GRADE USING COMPACTED ENGINEERED FILL OR PLAIN CONCRETE.
4. ALL FOUNDATION CONCRETE SHALL BE PLACED THE SAME DAY THAT EXCAVATIONS ARE DUG. LIGHT DUTY EQUIPMENT ISOLATION NOTES:

KINETICS LDR LIGHT DUTY RAIL ISOLATION SYSTEM IS A LOW-COST SOLUTION DESIGNED TO ISOLATE RESIDENTIAL STYLE CONDENSING UNITS AND OTHER LIGHT WEIGHT EQUIPMENT (SMALL FANS, MINI SPLIT SYSTEMS, ETC.). LDR ELIMINATES VIBRATION FROM PENETRATING INTO THE STRUCTURE AND OCCUPANTS BELOW.

ISOLATION SYSTEM SHALL BE COMPRISED OF TWO (2) INDEPENDENT SUPPORT RAILS WITH ADJUSTABLE EQUIPMENT MOUNTING CLIPS EACH SUPPORTED BY TWO (2) SEISMIC AND WIND RESISTANT HOUSED SPRING ISOLATORS. THE SPRINGS SHALL HAVE ALL OF THE CHARACTERISTICS OF FREE STANDING COIL SPRING ISOLATORS PER SECTION D BELOW. ISOLATORS SHALL CONSIST OF A SINGLE LATERALLY STABLE STEEL COIL SPRING ASSEMBLED INTO STEEL HOUSINGS DESIGNED TO LIMIT MOVEMENT OF THE SUPPORTED EQUIPMENT IN ALL DIRECTIONS.

HOUSING ASSEMBLY SHALL BE A STEEL MEMBER THAT INCLUDES PROVISIONS FOR ATTACHMENT TO STRUCTURAL OR ELEVATED ROOF ISLAND ELEMENTS. IT SHALL INTERFACE WITH A COIL SPRING LEVELING ASSEMBLY AND A 3-AXIS RESTRAINT SNUBBING ELEMENT THAT SHALL BOLT DIRECTLY TO THE UNDERSIDE OF THE EQUIPMENT SUPPORT RAIL. THE HOUSING SHALL BE FITTED WITH INTEGRAL NON-SKID ISOLATION PADS AND HOLES FOR ANCHORING THE HOUSING TO THE SUPPORTING STRUCTURE. HOUSING SHALL BE ZINC PLATED FOR OUTDOOR CORROSION RESISTANCE. HOUSING SHALL BE DESIGNED TO PROVIDE A CONSTANT FREE AND OPERATING HEIGHT WITHIN 1/8" (3 MM).

THE ISOLATOR HOUSING SHALL BE DESIGNED TO WITHSTAND THE PROJECT DESIGN SEISMIC FORCES IN ALL DIRECTIONS.

COIL SPRING ELEMENTS SHALL BE SELECTED TO PROVIDE STATIC DEFLECTIONS OF EITHER 1 OR 2 INCHES AS SHOWN ON THE VIBRATION ISOLATION SCHEDULE OR AS INDICATED OR REQUIRED IN THE PROJECT DOCUMENTS. SPRING ELEMENTS SHALL BE COLOR CODED OR OTHERWISE EASILY IDENTIFIED. SPRINGS SHALL HAVE A LATERAL STIFFNESS GREATER THAN 1.1 TIMES THE RATED VERTICAL STIFFNESS AND SHALL BE DESIGNED TO RETAIN A MINIMUM OF 0.75 INCH TRAVEL BEYOND THE RATED CAPACITY TO ACCOMMODATE OVERLOADS. NON-WELDED SPRING ELEMENTS SHALL BE EPOXY POWDER COATED AND SHALL HAVE A MINIMUM OF A 1000 HOUR RATING WHEN TESTED IN ACCORDANCE WITH ASTM B-117.

SPRING RAIL ASSEMBLY SHALL BE MODEL LDR AS MANUFACTURED BY KINETICS NOISE CONTROL.

3. INTERPRETATION OF THE DOCUMENTS

THE CONTRACTOR SHALL CAREFULLY COMPARE THE DRAWINGS AND SPECIFICATIONS, CHECKING THE MEASUREMENTS AND CONDITIONS UNDER WHICH CONSTRUCTION IS TO BE IMPLEMENTED. FOR CLARIFICATION BETWEEN VARIOUS DRAWINGS AND/OR SPECIFICATIONS, THE DISPUTED ISSUE SHALL BE REFERRED TO THE ENGINEER BEFORE ANY WORK IS EXECUTED. THE CONTRACTOR SHALL STATE IN THEIR PROPOSAL ANY EXCEPTIONS NECESSARY TO MAKE THIS WORK A COMPLETE AND READY-TO-USE INSTALLATION. IF NOT SO-STATED IN THE CONTRACTOR'S PROPOSAL, ANY SUCH WORK WILL NOT BE CONSIDERED ADDITIONAL.

4. NOT USED

5. SITE EXAMINATION

THE CONTRACTOR SHALL CAREFULLY EXAMINE THE CONTRACT DOCUMENTS, VISIT THE SITE, EXAMINE THE PREMISES, AND MAKE A THOROUGH SURVEY OF THE CONDITIONS UNDER WHICH CONSTRUCTION WILL BE IMPLEMENTED. THE SUBMISSION OF A PROPOSAL WILL BE CONSTRUED AS EVIDENCE THAT SUCH AN EXAMINATION HAS BEEN MADE. FAILURE TO DO SO SHALL NOT RELEIVE THE CONTRACTOR OF THE OBLIGATIONS OF THE CONTRACT. ANY LATER CLAIMS FOR LABOR, EQUIPMENT, OR MATERIALS REQUIRED FOR DIFFICULTIES ENCOUNTERED WHICH COULD HAVE BEEN FORESEEN HAD SUCH AN EXAMINATION BEEN MADE, WILL NOT BE RECOGNIZED.

6. PERMITS

ALL TEMPORARY WALL AND FLOOR OPENINGS SHALL BE PROTECTED AND MARKED AT ALL TIMES. PAINTING SHALL BE SCHEDULED SUCH THAT DRYING TIME OCCURS DURING NON-WORKING HOURS FOR OPERATIONS PERSONNEL COMFORT. NO WELDING SHALL TAKE PLACE INSIDE OF OPERATING FACILITY WITHOUT THE WRITTEN AUTHORIZATION OF THE OWNER'S PROJECT REPRESENTATIVE. WELDING SHALL NOT TAKE PLACE WITHIN 5 FEET OF ANY TELECOM EQUIPMENT RACK WITHOUT ADEQUATE PROTECTIVE MEASURES, AS DEEMED APPROPRIATE BY THE OWNER'S PROJECT REPRESENTATIVE. THE CONTRACTOR SHALL CHECK, VERIFY AND LABEL PHASE ROTATION ANY TIME LEADS ARE CONNECTED TO A NEW OR EXISTING AC SERVICE, GENSET, RECTIFIER OR ANY MOTOR-EQUIPPED, 3-PHASE EQUIPMENT. ALL THREE-PHASE PANELS SERVING SINGLE-PHASE LOADS SHALL BE BALANCED WITHIN 10 PERCENT, USING AMMETER READINGS. MEASUREMENTS SHALL BE TAKEN AT THE END OF CONSTRUCTION AND AGAIN AFTER 30 DAYS IN SERVICE.

Based on the layout for a sit-down event such as weddings, the space will accommodate a max of 140 guests. This includes a dance floor and DJ space. The top photo shows rectangular tables accommodating 128 with the head table of 12 people. This is 140 total. The bottom photo shows circular tables accommodating 120 with a head table of 12 people. This is 132 total. With servers, cleaning crew and security that will be approximately 145 people max.

The occupancy is 145 people.

VENUE GUIDELINES

RESULTS ON PARKING STUDY

Based on the data collected on available parking spaces on Friday and Saturday, there is sufficient parking available for an event of 145 people. Data from The results show an average of 54 to 57 street parking spots on Roosevelt Rd and selected side streets. The study focused on Friday and Saturday as they are peak days for celebrations. The study did not count residential streets; which can also be additional parking for events. The parking space across the street has been added as additional 20 spaces. The added parking spots reflect the overall parking availability. Due to the results of the study, there is sufficient parking on the street with the additional lot for events of 145 people.

PARKING PLAN

Based on the results, the plan is to use street parking and the parking lot across the street. If there is an event that does not require as much seating and would allow additional people, then an additional plan will come into effect. The additional plan is to use the parking lot at Warren Park Elementary School at 1225 S 60th Ct, Cicero. It is approximately three blocks from the event space. The parking lot as a total of 45 spots and will be used as a valet service.

E. Approval Standards

The listing of a use as a special use within a zoning district does not constitute an assurance or presumption that such special use will be approved. Rather, each special use must be evaluated on an individual basis, in relation to all applicable standards of this Ordinance. Such evaluation will determine whether approval of the special use is appropriate at the particular location and in the particular manner proposed. The recommendation of the Zoning Board of Appeals and decision of the Village Board must make findings to support each of the following conclusions:

1. **The establishment, maintenance, and operation of the proposed special use will not have a substantial or unduly adverse impact on the neighborhood or endanger the public health, safety, or welfare.**

   The space will serve as a flexible, professional environment for conferences, workshops, training sessions, art displays, meetings, and private gatherings. The space will operate exclusively for private bookings and will not function as a public venue, nightclub, or club-affiliated location. Events will not involve public ticket sales or payments at the door. Access will be limited to invited guests of the renting client. Reservations will be made by contract only with defined event hours to control noise level. The space is to benefit the community with supports of professional development and education, to encourage local creative expression through art displays, to provide safe, controlled gathering space, to attract small business and organizational activity, and to maintain a low-impact, private-use operational model. There will be no adverse impact on public health, safety, or welfare to the community. The proposed operation includes formal rental agreements for all events, clear use restrictions prohibiting public open-entry events, compliance with building, fire, and occupancy regulations, responsible alcohol policies (if applicable and permitted), and optional event oversight or management presence. Because the venue does not function as a nightclub, bar, or public entertainment facility, it avoids the operational characteristics typically associated with higher-intensity assembly uses. The use is structured, scheduled, and contract-based, ensuring accountability and compliance.

2. **The proposed special use is compatible with the general land use of adjacent properties and other property within the immediate vicinity.**

   The space is intended to support commercial, service, office, and mixed-use activities along the Roosevelt Road corridor while promoting pedestrian engagement and neighborhood-serving businesses. It meets the district guidelines with adjacent properties. The proposed event space operates as a commercial

rental venue consistent with business and service-oriented uses contemplated within the RR District. It functions in a manner similar to meeting halls, training centers, cultural spaces, and assembly uses typically found in commercial corridors. It activates commercial space without introducing retail congestion, heavy traffic turnover, or daily high-volume operations. The use supports the RR District's goal of maintaining viable commercial activity while allowing flexible occupancy models that respond to evolving business needs.

3. The special use in the specific location proposed is consistent with the spirit and intent of this Ordinance, adopted land use policies and the Comprehensive Plan.

The space is compatible with Roosevelt Road Corridor. The Roosevelt Road corridor includes a mix of retail, service, office, and commercial uses. A private event space complements this character by serving as a flexible commercial service use, drawing patrons who support nearby restaurants and businesses, enhancing corridor activity without creating daily retail competition, and maintaining a professional and community-oriented identity. The space will contribute positively to the commercial vitality of the corridor while respecting its mixed-use context.

4. The special use meets the requirements for such classification in this Ordinance.

The proposed space will be established, maintained, and operated in a manner that will not have a substantial or undue adverse impact on the surrounding neighborhood or endanger the public health, safety, or welfare. All events will take place within a fully enclosed building and will operate during reasonable hours to minimize disruption to nearby properties. The venue will maintain strict occupancy limits consistent with building and fire codes. Noise levels will be controlled through indoor programming and appropriate sound management practices. The property will be professionally maintained, including regular landscaping, lighting designed to avoid spillover onto adjacent properties, and proper waste management. Security and event supervision will be provided when necessary to ensure orderly conduct and compliance with all local ordinances. These operational measures ensure the venue will be compatible with surrounding uses and will not negatively affect the character, safety, or livability of the neighborhood.
