BIDDER QUESTIONS AND RESPONSES

4.01 QUESTION 1:

Question: What are the sizes for cutouts of the AV components?

Response: This is to be coordinated with the Contractors / Sub-Contractors and manufacturer as part of the construction process. In our opinion, this does not have an impact on the pricing of the work.

4.02 QUESTION 2:

Question: What exact size cut out for the areas that need blocking?

Response: See response to Question 1 above.

4.03 QUESTION 3:

Question: Partition on mezzanine: Please specify thickness of drywall for back side.

Response: 5/8"

4.04 QUESTION 4: LARGE CONFERENCE ROOM 101 - PLATFORM FOR CREDENZA:

Question 4A: What gauge angle and size for the framing?

Response 4A: 20 GA, 1 1/2 x 1 1/2

Question 4B: Will the vent cover be owner-furnished?

Response 4B: Floor vent is existing. Front louver is to be supplied by Contractor, not Owner.

Question 4C: Is the steel cover supplied for the end of the floor vent? [Typ. 5.535]

Response 4C: We do not understand this question.

4.05 QUESTION 5: LARGE CONFERENCE ROOM 101 - LIGHTING LINEAR FELT BAFFLE SUSPENDED SYSTEM GRID [TYP. 26.510]

Question 5A: Need installation print for that.

Response 5A: This will be provided by the Electrical Sub-Contractor as part of the construction submittal process.

Question 5B: Is it pre-made and needs assembly?

Response 5B: We assume a mix of pre-assembled and field assembly will be required.

Question 5C: How is it mounted to ceiling?

Response 5C: This will need to be identified as part of the submittal process during construction.

 SECTION 00 91 03

 Copyright 2025 by KLUBER, INC.; All Rights Reserved
 ADDENDUM NO. 3

Question 5D: Does it come with installation hardware?

Response 5D: Contact the manufacturer of the lighting system.

Question 5F: Acoustical panel specification for preferred installation method

Response 5F: Refer to Specification Section 09 84 30 and manufacturer's instructions.

4.06 QUESTION 6:

Question: Drawing TA-910 is blank so there are no signal flow drawings for the Small Conference Rooms; we need the information from these drawings in order to provide a quote for the four Small Conference Rooms Please advise

Response: Drawing TA-910 has been revised and reissued as a part of this addendu

4.07 QUESTION 7:

Question: Drawing TA-901 is labeled Video Signal Flow but it contains the identical content shown in drawing TA-900, labeled Audio Signal Flow. We need the information that was intended for TA-901 in order to provide a quote for Large Conference Room 101. Please advise.

Response: Drawings TA-900 and TA-901 have been revised and reissued as a part of this addendum.

4.08 **QUESTION 8**:

Question: We have not suggested any product substitutions. In the event that a specified device has been discontinued by the manufacturer, we are including in our quote its direct replacement as recommended by the manufacturer. Please confirm that this is acceptable.

Response: The AV Consultant does not object to including a manufacturer-recommended replacement if a specified device has been discontinued. However, this does not replace the required alternate product substitution process. Any products determined to be no longer available during shop drawing development must be identified, and alternate product information must be submitted for review and approval per the specifications. No substitution is considered approved until written approval is granted by the consultant.
