

Oak Park and River Forest Community Health Plan Visioning Process

PURPOSE

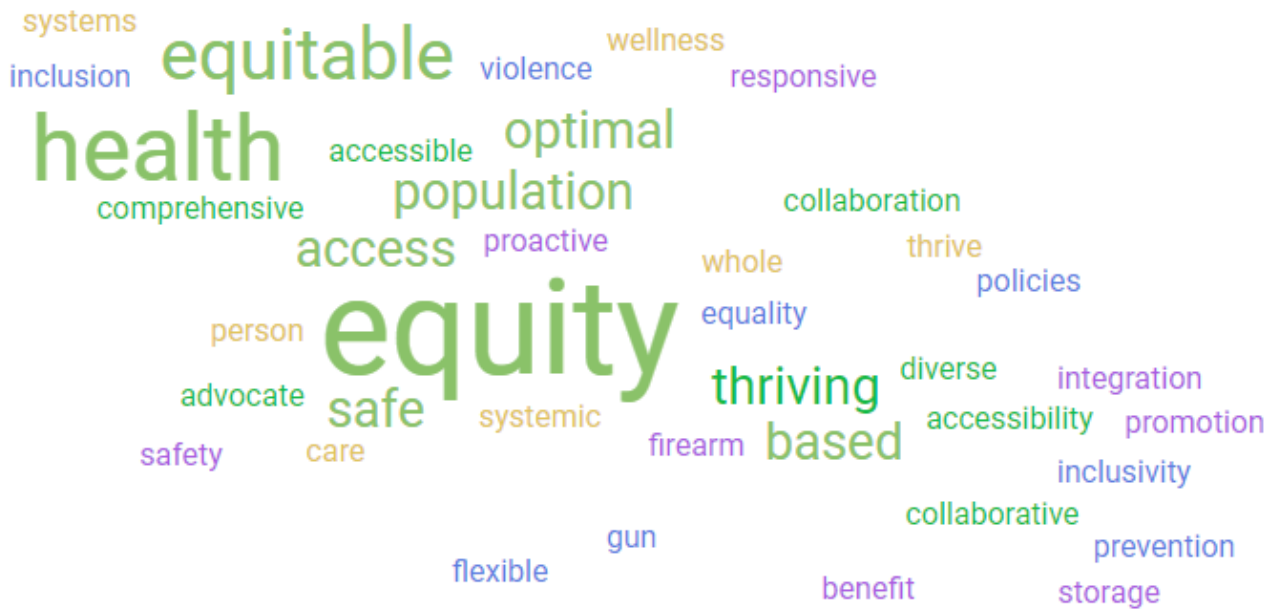

In Phase Two of the Mobilizing for Action Through Planning and Partnerships, or MAPP, process, community members and local public health system partners collaboratively create a shared vision.

PROCESS

To create this shared vision, at a meeting in June 2022, community members and public health system partners brainstormed words that they wanted to see in a vision statement for the IPLAN and for the community. The word cloud below shows some of the words that came up most often, such as equity.

The IPLAN core team then worked together in a facilitated meeting to develop a collective vision statement that reflected this feedback from community stakeholders. The resulting vision statement was shared at the strategic issues identification meeting in July 2022 and in virtual community feedback sessions in August 2022 for additional feedback.

VISION STATEMENT

We envision a safe, thriving, and inclusive Oak Park and River Forest, where everyone who lives, works, and plays in our communities can attain optimal health through proactive community strategies that promote equitable health outcomes.
