Section II. Scope of Services

Project Background

The Village of Oak Park awarded a contract to Alliance Contractors, Inc. on October 1st, 2018 in the amount of \$1,216,605.40 for the Village Hall Parking Lot Improvements project. It was originally anticipated to construct this project last fall but during design it was realized that it was not feasible due to early-voting at village hall.

This project consists of various improvements to the village hall parking lot including: resurfacing, replacement of lighting, repairs to the basement-garage, perimeter landscaping, and beautification of the plaza-area, as well as installation of vehicle charging-stations. The resurfacing portion of the work includes removal and replacement of the pavement, curb removal and replacement, and striping. While the parking lot is being removed structural repairs will be performed on the south portion of the basement-garage; the north portions of the basement-garage repairs were performed in 2016. The lighting in the parking lot is original and will be replaced in accordance with current lighting standards. The repair of the south portion of the basement-garage will disturb a large portion of the current plaza area which is proposed to be beautified with installation of hexagon unit pavers throughout, decorative planters, new trees, and the addition of street-furniture to make the space more inviting and a place for residents and staff to meet. The perimeter of the parking-lot while being disturbed by this work will be replaced with new planting materials. The project also includes installation of charging-stations in the parking lot. It is proposed to include three dual-stations (6 docks) in the south portion of the parking lot for future fleet electric-vehicles and two dual-stations (4 docks) in the center island of the parking lot for customer electric-vehicles.

The village in general will act as the project-manager for the project in regards to coordination and communication with the village hall staff, as there will be extensive parking impacts that will affect the staff and visitors to village hall. The consultant's inspector will manage the day-to-day communication with the contractor and oversee all construction. The inspector shall have a minimum of 5 year's experience as the lead construction-inspector on similar sized projects. The inspector shall be available on a part-time basis as needed the week prior to construction start for any coordination with the contractor, and for reviewing items such as construction-staking. In general during construction it will be expected that the construction-inspector will be full-time during the major activities but towards the end of the project part-time coverage is acceptable during installation of items such as trash-cans, benches, etc. During the punch-list portion of the project it is also acceptable for the construction-inspector to be on a part-time basis.
