## 427 Madison Street Development

March 18, 2024

### Special Use Approval Standards: Section 14.2 (E)

1. The establishment, maintenance, and operation of the proposed special use will not endanger the public health, safety, or welfare.

The proposed development will be constructed in accordance with all applicable codes and ordinances adopted by the Village of Oak Park including the IBC building codes which govern construction type for the development and the zoning code with exceptions as cited in the Zoning Variances for this development. In following these codes and ordinances, the development's maintenance, and operation of the proposed special use will not endanger the public health, safety, or welfare.

2. The proposed special use is compatible with the general land use of adjacent properties and other property with the immediate vicinity.

The proposed special use is compatible with the general land use of adjacent properties and other property with the immediate vicinity in that it generally complies with the zoning ordinance for this zone district, with minor variances that are part of this Application. Further, the development generally complies with Envision Oak Park as it relates to providing unique ways to add residential uses throughout the Village and Oak Park's comprehensive plan for land uses in this zone district.

3. The special use in the specific location is consistent with the spirit and intent of this Ordinance and adopted land use policies.

The use of the proposed development is consistent with the proposed uses and locations as first adopted by the Madison Development plan in the early 1990's. The proposed use, given it's scale and intensity of use, building height and other zoning metrics is consistent with the Ordinance and other previously approved developments along Madison Street.

Special Use Approval Standards: Section 14.2 (E), continued

4. The special use conforms to the regulations of the zoning district in which it is to be located.

The proposed development generally conforms to the regulations of the zoning district, except for the variances requested under this application, see the zoning analysis that is attached.

## 427 Madison Street Development

March 18, 2024

Revised March 23, 2024

### Section 14.3 Variation Standards

#### Approval Standards

1. The Zoning Board of Appeals decision must make findings to support each of the following:
  - a. The strict application of the terms of this Ordinance will result in undue hardship unless the specific relief requested is granted.

If the strict application of the terms of this Ordinance are applied, the proposed development will not be feasible. Specifically, if the height relief is not granted, given the soils conditions and limitations of the land use for residential use on the first floor of the development, the development will not meet certain market demands for outdoor use (the upper level's outdoor spaces) and therefore not be feasible.

Similarly, if the building setback relief to the south is not granted, then the proposed development will not be feasible given the potential loss of square footage for each townhouse unit. Specifically, at grade level, the only items that encroach onto the five-foot side yard setback are structural columns at each of the townhomes' demising walls and structural beams that run from each column back to each townhome. The south wall of each townhome is 8 feet 5 inches to the north – well beyond the five-foot side yard setback. See SK 2.1 If the strict application of the terms of this Ordinance are applied, these columns would need to be moved five-feet to the north along with the driveway, the developments only vehicular access. This adjustment would create certain structural conditions that will create a

hardship with typical townhouse construction. That condition along with the condition as cited in paragraph one of this response, now adds to the hardship that is inherent in this property – specifically the unusual width of the property. The width has been a historic impediment to development in this zone and along Madison street.

Similarly, if the building setback relief to the west is not granted, then the proposed development will not be feasible given the potential loss of townhouse units. Specifically, Given the cited hardships in Paragraph one and two of the response, the potential loss of one townhome unit, makes this development not feasible. Already the development hinges on feasibility given the limitations on the use at the grade level, building height, building setbacks to the east, north and south. The applicant has agreed to add a two foot relief to the west in order to allow for relief of traffic conditions along what is admittedly a very restricted alley width. Additionally, it should be stated that if the strict application of the terms of this Ordinance are applied, the additional distance does not benefit the community. It merely adds a distance between its neighbor to the west, a multifamily building, and creates a gap in the urban fabric giving the illusion that the public alley is wider than it actually is - eight feet.

Now therefore, given the stated facts in paragraph one, two and three, If the strict application of the terms of this Ordinance will result in undue hardship unless the specific relief requested is granted.

b. The particular physical surroundings, shape or topographical conditions of the specific property impose a particular hardship upon the owner, as distinguished from a mere inconvenience, if the strict letter of the regulations were to be carried out.

The proposed development's size, specifically the width as cited in Standard number one's applicant's response, and shape of the property's boundaries and the property's environmental conditions of the specific property impose a particular hardship upon the owner, as distinguished from a mere inconvenience, if the strict letter of the regulations were to be carried out.

c. The plight of the owner is due to unique circumstances inherent to the subject property and not from the personal situation of the owner and has not been created by any person presently having a proprietary interest in the property in question.

The plight of the owner and applicant related to this property are due to unique circumstances inherent to the subject property – specifically the property's location on a corner, the lot size, lot width and most importantly, the property's environmental condition – no residential use on the ground floor has not been created by any person presently having a proprietary interest in the property in question.

2. The Zoning Board of Appeals, in making its findings, may inquire into the following evidentiary issues, as well as any others deemed appropriate:

- a. The granting of the variation will not be detrimental to the public health, safety, and welfare in the neighborhood in which the property is located.

The proposed development will be constructed in accordance with all applicable codes and ordinances adopted by the Village of Oak Park including the IBC building codes which govern construction type for the development and the zoning code with exceptions as cited in the Zoning Variances for this development. In following these codes and ordinances, the development's maintenance, and operation of the proposed special use will not endanger the public health, safety, or welfare.

- b. The proposed variation will not impair an adequate supply of light and air to adjacent property, substantially increase congestion in the public streets, increase the danger of fire, endanger the public safety, or impair property values within the neighborhood.

Similarly, the proposed development will be constructed in accordance with all applicable codes and ordinances adopted by the Village of Oak Park including the IBC building codes which govern construction type for the development and the zoning code with exceptions as cited in the Zoning Variances for this development.

In following these codes and ordinances, the development's The proposed variation will not impair an adequate supply of light and air to adjacent property nor increase the danger of fire, endanger the public safety.

In terms of congestion, given the property's prior use as a gas station, the proposed use for residential townhomes, the development will not substantially increase congestion in the public streets.

Finally, the proposed development will, in the applicant's experience, help support adjacent and neighboring property values given the consistent use (residential, moderate density housing).

c. The proposed variation is consistent with the spirit and intent of this Ordinance and the adopted land use policies.

The proposed special use is compatible with the general land use of adjacent properties and other property with the immediate vicinity in that it generally complies with the zoning ordinance for this zone district, with minor variances that are part of this Application. Further, the development generally complies with Envision Oak Park as it relates to providing unique ways to add residential uses throughout the Village and Oak Park's comprehensive plan for land uses in this zone district.
